CineSat patch V4.14.4 available

2018-05-08

Several interface issues with new EUMETCast data have been rectified in CineSat V4.14.4.

Real-time input data streams are continuously changing. We recommend to install this patch in order to be up-to-date with latest changes to data formats.
Please contact your CineSat Support Team if you should have any difficulties regarding the download, installation, or use of the new release.
