Cities lose, on average, one third of their water supply as it passes through the pipes before reaching consumers.

CineSat

CineSat is image data at your fingertips. A professional software suite for high-class satellite meteorology and early disaster warning. Detect severe weather, get forecasted weather movies and automatically update your intranet with latest incoming data and analysis products. CineSat combines best validated methods with high performance tools. Designed for interoperability, flexibility, and successful international cooperations.
